- Best TA ever.
- Bohyun always prepared good notes and examples to go over during discussion and it really helped clear up a lot of concepts I didn't understand during lecture. However, sometimes when people ask a question, it seems like she doesn't understand what they ask and has some difficulty answering the question. Overall though, she seems to be an experienced and caring TA. She always asks us if we have any questions we would like her to ask the professor which I thought was a very nice thing to do.
- Bohyun is one of the best math TA's I've had and explains the concepts very clearly and simply. She does a lot of problems from the textbook in discussion that help with the homework. This is not related to the educational process, but she is well-put together and really pretty.
- Boyun is the best TA I have ever had. I know never to miss one of her discussions because I learn more from her than the actual professor. She is able to summarize what we have learned so far really well and is able to answer questions well too.
- Excellent TA in all respects, by far my best in my time at UCLA. Always went through a brief explanation of the topics covered in the past week and then went over relevant problems from the book (that she has already worked through herself which many TA's do not). She covered all the topics in a way that didn't assume you already understood them which was very helpful if you didn't understand a part of lecture. Answered questions thoroughly, and didn't let a single student waste tons of time as sometimes happens in discussions. I wish she TA'd all of my classes.
- I thoroughly appreciate how organized her notes are.
- Never went to a single discussion this quarter but still doing well in the class.
- She was a good instructor. She laid the concepts out (from the week) on the board and that helped clarify any misconceptions I had. She was really good at clarifying and simplifying. There were times
where people would ask questions and she wouldn't know the answer. Also she forgot to bring the graded homework to the section a few times and didn't want to bring it to the next discussion, despite telling us she would. (she wanted us to come to office hours, during which I had a class). It was frustrating because I wanted the homework back, but thankfully she eventually brought the late homework assignments.

- She was a very good TA for this 33B class. She did an excellent job of explaining the concepts from class in a clear way.
- She was a very good teacher and was able to condense all of the information down into the relevant bits of info that we needed. Her teaching was very good and the class overall was interesting.
- TA is good at going over things we need to know during discussion. Helpful if there are any problems that arise.
- The TA was really nice and caring. I can see how she put in the time to care for her students and to listen to our struggles. She knew what she was doing, and honestly helped me understand the class a lot through the discussions. Really good and caring TA!

- Bohyun was an awesome TA who helped make a difficult class more easy. She was great at explaining concepts and always shared her notes on CCLE for those who couldn't attend.

- Bouyun was really good at making students feel heard and she was really understanding. I did feel that she covered content in a slightly convoluted way that was hard for me, personally, to follow. There were also a few discussions which she skipped and only told students about right before. Overall, she was a good TA.

- Everything looks pretty good here. There wasn't much "discussion" but the as she went through the problems step-by-step I could really start to understand things the professor skimmed over in lecture because he didn't think it was important.

- Helpful to fill in blanks with lecture examples and homework problems.

- I only went to her section a couple of times, but the times I did go she was very helpful in communicating class topics and offering help with homework. She did not email me back the one time I did email her, this was only one instance so I can't say if it is a trend but it still happened. It was also a pretty general question about class statistics on a midterm so I don't think it would have been hard to reply, even if it was just saying she didn't know the answer.

- I think my TA was extremely helpful to learning the material for this course. She was very clear in her lesson plans and knew how to teach the material to us.

- She was really good at explaining material and was really kind/friendly also. One of the best TAs I've had so far at UCLA.

- TA was very knowledgable on the content and very approachable to all types of questions.

- Thank you for uploading your beautiful discussion notes to CCLE! I also appreciate your empathy in...
helping us with study skills and mental health, and your willingness to help us outside of discussion. Thank you so much!

- The TA was very very helpful in discussion. She summed up all the confusion of week's lecture in one systematic method. She's very organized in the way she teaches and it makes it easy to follow.

- This TA was stellar! She went over both content and just steps on how to approach certain problems. She was always willing to help and answer questions in class and is hilariously relateable. Thanks for a great quarter!

- While the TA was not very dynamic in her voice. Despite being a dull lecturer, she was very good at explaining things and was essential to understanding what the essential parts of the lecture and textbook were.

- great TA, really made difficult concepts clear

- Bohyun is a wonderful TA. She really cares about her students and always takes the time to explain things. All my other TAs just cancelled their office hours due to the coronavirus, but Bohyun was so thoughtful because she did not cancel them and instead held her office hours over Zoom. She really goes above and beyond. Great TA!

- I appreciate the help the TA provided with regards to the homework, because I would have struggled even more without the discussion sections. The communication between the TA and the professor also left something to be desired. There was often confusion over who was actually providing the correct information.

- This TA is funny and that makes class really enjoyable at times

- Very clear, very nice, very effective. Loved this TA.

- You were the only bright point in this class. Thanks for helping us out. Working out homework problems saved a ton of headache when I went back to do them. Seeing how you got a solution (which wasn't necessarily the way I would), was super helpful.
